APPENDIX A – MARKED-UP VERSION OF THE AMENDED CLAIMS

4. (Amended) A receiver/decoder according to claim 1 [any preceding claim], wherein the means for communicating the debugging message is adapted to transmit a debugging message containing information concerning execution of the application by the receiver/decoder.
5. (Amended) A receiver/decoder according to claim 1 [any preceding claim], wherein the application comprises a plurality of files, the receiver/decoder comprising means for selectively reading at least one of the files from the remote workstation.
8. (Amended) A receiver/decoder according to claim 5 [or claim 7], wherein the receiver/decoder is adapted to read an individual file from the remote workstation.
10. (Amended) A receiver/decoder according to claim 5 [any of claims 5 and 7 to 9], wherein the receiver/decoder is adapted to load a boot file from the remote workstation.
11. (Amended) A receiver/decoder according to claim 5 [any of claims 5 to 10], wherein the receiver/decoder is adapted to read said at least one file as it is required to run the application.
12. (Amended) A receiver/decoder according to claim 5 [any of claims 5 to 11], wherein the receiver/decoder is adapted to read updated files.
16. (Amended) A workstation according to claim 14 [or claim 15], wherein the means for allowing access to said at least one file is adapted to allow an individual file to be read.
17. (Amended) A workstation according to claim 14 [any of claims 14 to 17], further comprising means for editing the application.

22. (Amended) An application development tool according to claim 20 **[or claim 21]**, wherein the application comprises a plurality of files.
24. (Amended) An application development tool according to claim 22 **[or claim 23]**, wherein the receiver/decoder is adapted to read a file as it is required to run the application.
25. (Amended) An application development tool according to claim 22 **[any of claims 22 to 24]**, wherein the workstation is adapted to update a file and the receiver/decoder is adapted to read said files once updated.
26. (Amended) An application development tool according to claim 22 **[any of claims 22 to 25]**, wherein the receiver/decoder is adapted to read the most recent version of a file.
27. (Amended) An application development tool according to claim 22 **[any of claims 22 to 26]**, wherein the workstation is adapted to instruct the receiver/decoder to discard a file.
28. (Amended) An application development environment comprising an application development tool according to claim 26 **[or claim 27]** and a network over which the workstation and the receiver/decoder communicate.
32. (Amended) A method according to claim 29 **[any of claims 29 to 31]**, further comprising transmitting from the receiver/decoder a debugging message containing information concerning execution of the application.
33. (Amended) A method according to claim 29 **[any of claims 29 to 32]**, wherein the application comprises a plurality of files, the method further comprising selectively reading at least one of the files from the remote workstation.

36. (Amended) A method according to claim 34 **[or claim 35]**, comprising updating a file and transferring the updated file to the receiver/decoder.
